

Greetings, Earthlings. My name is Wick-it the Instigator, and this is my new sample pack... Gimme All Your Drums (Vol. 1).

All the sounds were made from sampling old vinyl records. These are all single note one shots... no loops whatsoever, so everything can be played or sequenced in any tempo you desire. I also didn't use any "ultimate breaks" or "battle" style DJ records to curate any of this collection. Every single sound is wild caught and certified fresh. There are 112 total drum shots that have been divided up into 7 kits. The kits contain samples that are cohesive and in tune with each other, and there's also one or two musical samples in each kit to make them more fun to play, making it feel more like a full beat rather than just strictly drums. Each kit has multiple kicks and snares, along with various percussion bits. It's also important to note that the kits are merely suggestions, and that all the sounds are completely interchangeable.

I also tried to focus on adding little nuances that you often don't find in drum packs. Little things like pedal hats, two-stick snare hits, snare/cymbal combos, and multiple hi-hats can really add organic idiosyncrasies to your rhythms.

I would love to hear your thoughts and feedback, so please feel free to keep in touch, peace!
